

WETLANDS & ECOLOGY, INC.

Wetlands & Ecology, Inc. (W&E), a small, woman-owned business, is looking to fill a full-time position for a scientist. The prospective candidate will be performing technical and field work on a wide variety of ecological projects. The following are some of the consulting services W&E performs:

- Ecological risk assessment, predominantly in New Jersey, ranging from simple to complex projects
- Wetlands and Waters of the US delineations
- Design of a wide variety of wetlands for mitigation, including tidal marsh, emergent, scrub/shrub and forested wetlands
- Applications for a variety of environmental permits throughout the Mid-Atlantic region
- Design, permitting and construction of green stormwater infrastructure

Additional information about our company can be found at www.wetlandsandecology.com.

We consider this position ideal for the individual who is interested in challenging, technical work in a professional environment. Our ideal candidate will have a Bachelor's or Master's degree in Biology, Ecology, Chemistry, or Environmental Science with three or more years of work in the environmental industry on similar projects.

This position provides compensation commensurate with the experience of the individual. The position will require occasional field work, primarily in eastern Pennsylvania and New York and throughout New Jersey. W&E provides worker's compensation insurance, but we do not provide an employer-sponsored medical, vision or dental insurance. W&E provides paid holidays and personal time (sick and vacation pay). We are open to working remotely and meeting as necessary to go over project work. W&E will supply the necessary hardware and software to complete assignments (laptop with Microsoft Office products and necessary field equipment).

Interested parties should forward a letter of introduction and resume to Derron LaBrake via email (dlabrake@wetlandsandecology.com).
